Georgina Grant
Centre Leader

Welcome to GenesisCare in Chelmsford

We are one of 14 GenesisCare centres across the UK providing the latest cancer diagnostics and treatment to private patients. Here in Chelmsford we offer some of the most advanced radiotherapy techniques, working closely with leading health professionals and investing in cutting-edge treatments that are proven to be safe and effective.

Our centre has a partnership with the Springfield Hospital to provide comprehensive diagnostics and chemotherapy treatments to our patients. This means that you don't have to travel far to find world-class cancer care provided as standard, with treatment starting within days or even hours of diagnosis.

We have a dedicated and highly experienced team at Chelmsford and we're proud to help each and every patient through their treatment – and that so many of them have rated our care as excellent.

From symptoms to survivorship – and everything in between – we're here to change the way people experience cancer treatment and care, understanding what it takes to achieve the best possible life outcomes and going a little further to provide it.

treatment and care**

GenesisCare
Chelmsford
Centre for oncology and wellbeing

Our GenesisCare centre in Chelmsford is designed for world-class cancer care

Cancer treatment and care is constantly evolving and, as a global organisation, GenesisCare stays abreast of the latest evidence-based treatments from around the world, investing in those that will benefit our patients here in the UK.

The main approaches to cancer care are early detection and diagnosis so cancers can be more easily treated, surgery to remove tumours, radiotherapy to target and destroy cancer cells and chemotherapy – a wide range of drug therapies that destroy specific cancer cells.

At our Chelmsford outpatient (day) centre, we provide many of these treatments on site or at our partner hospitals and we use some of the most advanced techniques to treat all types of cancer.* These include powerful MRI (magnetic resonance imaging) for detailed scans and radiotherapy techniques that are proven safe and effective for difficult-to-reach tumours while limiting dose to healthy tissue.

We work with local leading oncologists to collect patient-reported outcome measures (PROMs) and feedback to help us ensure our services continue to meet patient needs – both in terms of health outcomes and the practicalities of treatment.

*Surgery is undertaken at partner hospitals

"I have been treated with empathy and dignity and I could not have wished for a higher standard of care"

Patient, Chelmsford

Our patients are referred to us from across Essex as well as further afield, and we have a reputation for delivering excellent care.

Patients can also be referred to specialist services available at other GenesisCare centres within our network. These include new treatments such as MRIdian MRI-guided radiotherapy for difficult-to-treat tumours, stereotactic radiosurgery for small brain tumours and Theranostics – an innovative therapy for certain cancers when other treatment options aren't suitable or effective.

Your oncologist will work with experts throughout our network to ensure that you have the most appropriate treatment for you.

It matters to us that so many of our patients can take away some positive experience from their cancer journey

What we offer at Chelmsford

Advanced radiotherapy

- Volumetric modulated arc therapy
- Stereotactic ablative radiotherapy
- Image-guided radiotherapy
- Surface-guided radiotherapy
- Deep inspiration breath hold

We offer different types of radiotherapy depending on your needs alongside advanced techniques for precision targeting.

If you'd like more information about any of our services, please go to [genescare.com](https://www.genescare.com) or ask for one of our patient brochures

Supporting therapies

- Penny Brohn UK

This supports emotional wellbeing and is provided to anyone receiving chemotherapy or radiotherapy as a patient of GenesisCare.

Chemotherapy

Chemotherapy is provided within our partner hospitals. These treatments are administered by a team of specialist nurses under the guidance of your referring oncologist.

We also have specialised services at these centres that are available to all patients

When required, we'll help our patients with transport depending on treatment and locations. Please enquire for more details.

More than treating your cancer

We know that for many people cancer is a life-changing experience and our goal is to help you meet the emotional and psychological challenges in the most positive way possible. That's why we've partnered with Penny Brohn UK to provide a ground-breaking approach to complementary and wellbeing therapies alongside conventional medicine. Through a programme carefully tailored to your needs, we can help you to deal with the side effects of treatment, reduce stress, improve energy levels and let you take back control.

Our key specialists can offer advice on how to live with cancer and minimise the impact of treatment. They also have strong links with local cancer support networks and survivorship programmes.

We are proud to have the Macmillan Quality Environment Mark demonstrating that our centre is welcoming and accessible to all and that we are respectful and supportive, listening to you and giving you control over how you use our services.

We can design and plan treatments around your work and life commitments. When required, we'll help our patients with transport depending on treatment and locations and there's ample parking if you drive. A friend or family member is welcome to come with you to your appointments and a variety of refreshments are available.

Here for you

These are some of the different experts and support staff who make up our teams.

Your care will be led by a consultant oncologist who will work alongside our experienced team based here at our centre and partner hospitals. Together they will manage your personalised treatment and care plan.

Consultant oncologist

All of our consultant oncologists also work in large London and regional NHS hospitals. This means they have the very best knowledge and experience and are familiar with local healthcare networks. They use various methods to treat cancer, including chemotherapy and radiotherapy.

Therapy radiographer

Involved in radiotherapy planning scans, treatment planning and delivering radiotherapy. You'll see them at every radiotherapy session.

Dosimetrist

Helps your oncologist plan your radiotherapy treatment to destroy cancer cells while limiting damage to healthy tissues.

Physicist

Measures the dose of radiation you receive during radiotherapy to ensure it is safe and as prescribed by your oncologist.

Clinical nurse specialist

Has additional training in a particular cancer, to help treat and manage cancer-specific symptoms or treatment side effects.

Penny Brohn wellbeing consultant

Provides complementary and wellbeing therapies that are proven to ease cancer-related concerns.

Patient administration officer

Responsible for booking your treatments, dealing with funding and insurance and arranging transport.

Our key specialists also have strong links with local cancer support networks and survivorship programmes

We're easy to get to

From the A12, exit onto the A130, through to White Hart Lane, then onto Chelmer Valley Road. At the roundabout turn left onto Lawn Lane, following signs for Springfield Hospital.

From the M11, exit onto the A414 past the double roundabout, follow signs to Widford Industrial Estate and Town Centre. On joining Parkway, follow signs for Stansted A130/Sudbury A131 onto Chelmer Valley Road. Turn right at the roundabout, following signs for Springfield Hospital.

Chelmsford Railway Station is five minutes away by car.
