

From symptoms to survivorship
– and everything in-between
– we have invested over
£20 million to provide
world-class cancer care
to people locally, nationally
and internationally.

Oxford
Centre for diagnostics,
oncology and wellbeing

■ Gillian Taylor
Centre Leader

Welcome to GenesisCare in Oxford

Our centre is part of a UK network providing world-class cancer diagnostics and treatment. Here in Oxford we offer some of the UK's most advanced cancer therapies, working closely with leading health professionals and investing in cutting-edge treatments that are proven to be safe and effective.

This means that you don't have to travel far to find the latest techniques provided as standard, with treatment starting within days or even hours of diagnosis.

As a patient, you can expect to receive the very best personalised care and a treatment plan that also embraces life-changing approaches such as wellbeing therapies.

We have a dedicated and highly experienced team here at Oxford and we're proud to help each and every patient through their treatment – and that so many of them have rated our care as excellent.

We're here to change the way people experience cancer treatment and care, understanding what it takes to achieve the best possible life outcomes and going a little further to provide it.

GenesisCare

Oxford

Centre for diagnostics,
oncology and wellbeing

Our purpose-built GenesisCare centre in Oxford delivers world-class diagnostic and cancer care

Cancer treatment and care is constantly evolving and, as a global organisation, GenesisCare stays abreast of the latest evidence-based treatments from around the world, investing in those that will benefit our patients here in the UK.

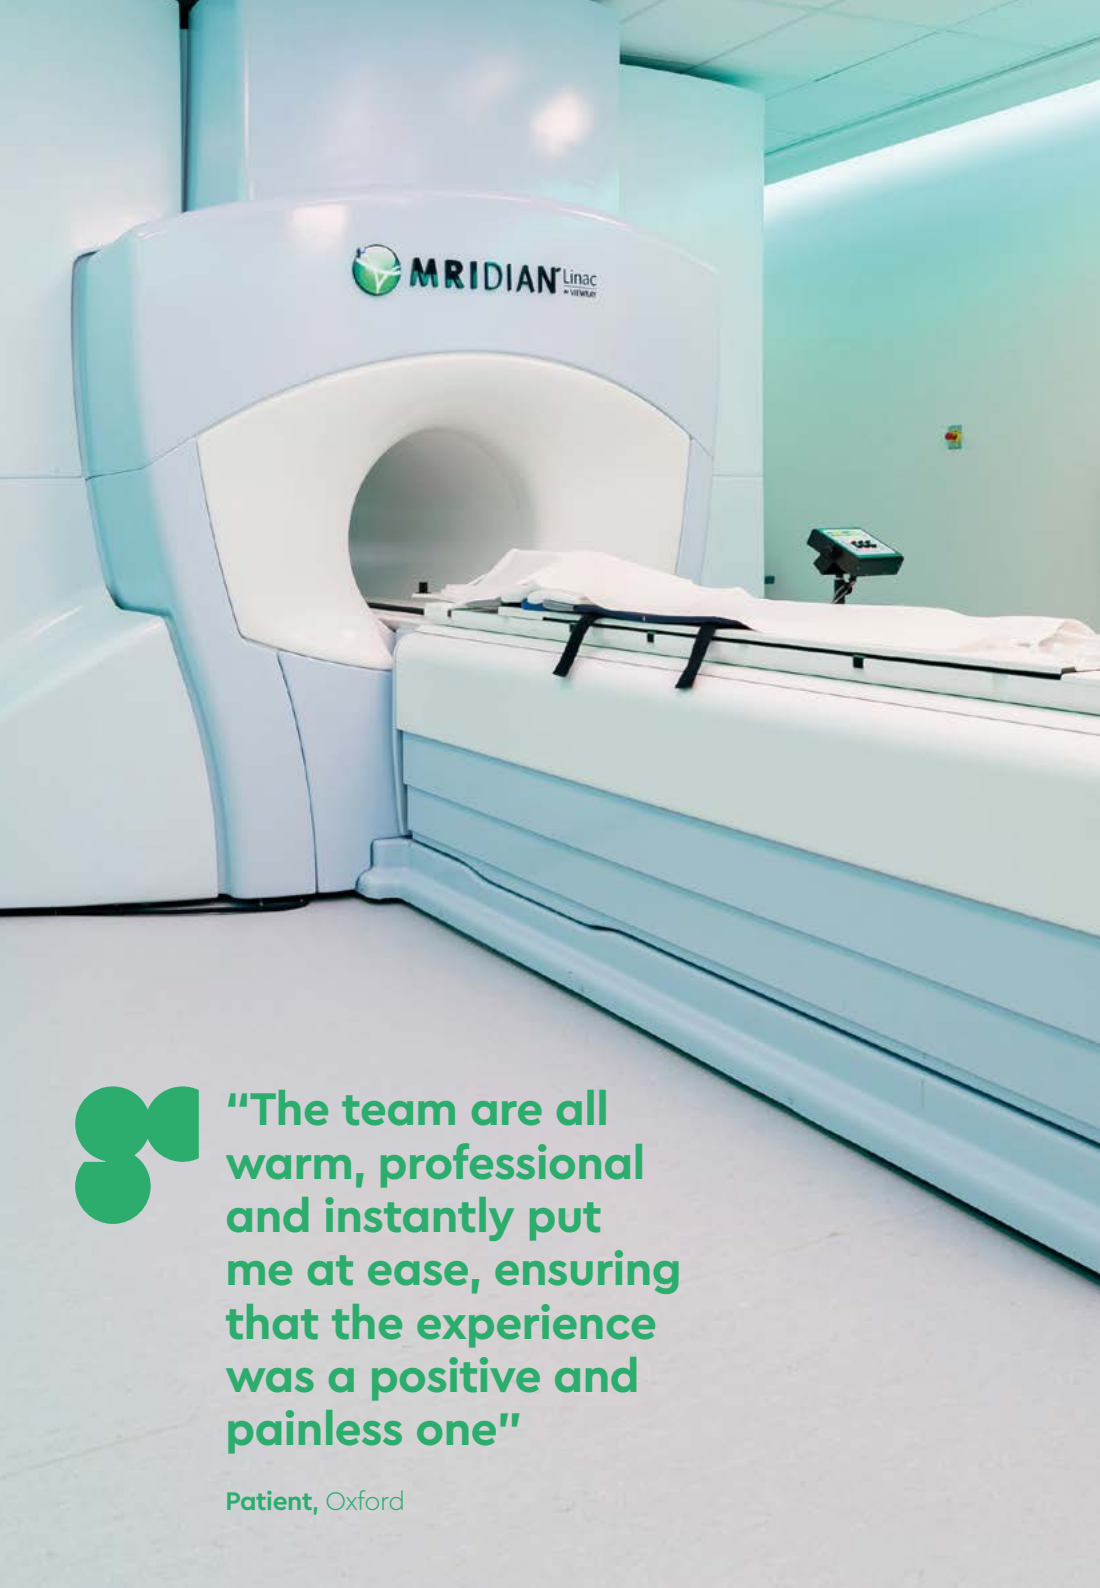

The main approaches to cancer care are early detection and diagnosis so cancers can be more easily treated, surgery to remove tumours, radiotherapy to target and destroy cancer cells and difficult-to-reach tumours, and chemotherapy – a wide range of drug therapies that destroy specific cancer cells.

At our Oxford centre, we provide many of these treatments and use some of the most advanced techniques to treat all types of cancer.*

These include powerful advanced 3T MRI (magnetic resonance imaging) for very detailed scans, precision radiotherapy techniques that are proven safe and effective for difficult-to-reach tumours while limiting dose to healthy tissue and high-dose radiotherapy for shorter treatment duration.

*Surgery is undertaken at partner hospitals

MRIDIAN Linac
by Varian

"The team are all warm, professional and instantly put me at ease, ensuring that the experience was a positive and painless one"

Patient, Oxford

We are a centre of excellence for stereotactic radiosurgery (SRS), which is non-invasive surgery for brain tumours, and have the UK's first MRidian – the latest precision radiotherapy for prostate, lung, pancreatic and liver cancers.

All patients are offered access to wellbeing therapies during their treatment at no extra cost to them or their insurer through our unique partnership with the Penny Brohn UK cancer charity.

Our patients are referred to us from across the Oxfordshire area as well as further afield and we have a reputation for delivering excellent care. We are proud to have been rated "outstanding" by the Care Quality Commission for the quality of our care.

It matters to us that so many of our patients can take away some positive experience from their cancer journey

This supports emotional wellbeing and is provided to anyone receiving chemotherapy or radiotherapy as a patient of GenesisCare.

If you'd like more information about any of our services, please go to [genescare.com](https://www.genescare.com) or ask for one of our patient brochures

We also have additional specialised services at our centre in Windsor that are available to all patients.

- SPECT/CT
- Theranostics – ¹⁷⁷Lutetium PSMA therapy

When required, we'll help our patients with transport depending on treatment and locations. Please enquire for more details.

More than treating your cancer

We know that for many people cancer is a life-changing experience and our goal is to help you meet the emotional and psychological challenges in the most positive way possible.

That's why we've partnered with Penny Brohn UK to provide a ground-breaking approach to complementary and wellbeing therapies alongside conventional medicine. Through a programme carefully tailored to your needs, we can help you to deal with the side effects of treatment, reduce stress and let you take back control.

We are proud to have the Macmillan Quality Environment Mark demonstrating that our centre is welcoming and accessible to all and that we are respectful and supportive, listening to you and giving you control over how you use our services.

We can design and plan treatments around your work and life commitments. When required, we'll help our patients with transport depending on treatment and locations and there's ample parking if you drive. A friend or family member is welcome to come with you to your appointments and a variety of refreshments are available.

Here for you

These are some of the different experts and support staff who make up our teams.

Your care will be led by a consultant oncologist who will work alongside our experienced team based here at our centre and partner hospitals. Together they will manage your personalised treatment and care plan.

Consultant oncologist

All of our consultant oncologists also work in large regional NHS hospitals. This means they have a very wide knowledge and experience and are familiar with the Oxfordshire healthcare networks. They use various methods to treat cancer, including chemotherapy and radiotherapy.

Diagnostic radiographer

Uses imaging techniques, such as MRI and CT, to capture and interpret scans and reports their findings to your consultant.

Therapy radiographer

Involved in radiotherapy planning scans, treatment planning and delivering radiotherapy. You'll see them at every radiotherapy session.

Haematologist

A consultant who specialises in disorders of the blood, including leukaemia, lymphoma or myeloma.

Radiologist

A consultant who specialises in using imaging techniques to diagnose and stage disease.

Our key specialists also have strong links with local cancer support networks and survivorship programmes

Dosimetrist

Helps your oncologist plan your radiotherapy treatment to destroy cancer cells while limiting damage to healthy tissues.

Physicist

Measures the dose of radiation you receive during radiotherapy to ensure it is safe and as prescribed by your oncologist.

Chemotherapy nurse

Administers and monitors chemotherapy, helps evaluate the effectiveness of treatment and advises on side effects and aftercare.

Pharmacist

Dispenses medicines as prescribed by your oncologist and assists in clinical trials.

Clinical nurse specialist

Has additional training in a particular cancer, to help treat and manage cancer-specific symptoms or treatment side effects. We have clinical nurse specialists for breast, brain, and head and neck cancer.

Penny Bohn wellbeing consultant

Provides complementary and wellbeing therapies that are proven to ease cancer-related concerns.

Patient administration officer

Responsible for booking your treatments, dealing with funding and insurance and arranging transport.

We're easy to get to

We're located south east of Oxford city centre, just off the A4142 Oxford ring road, accessible from the M40, A40 and A34.

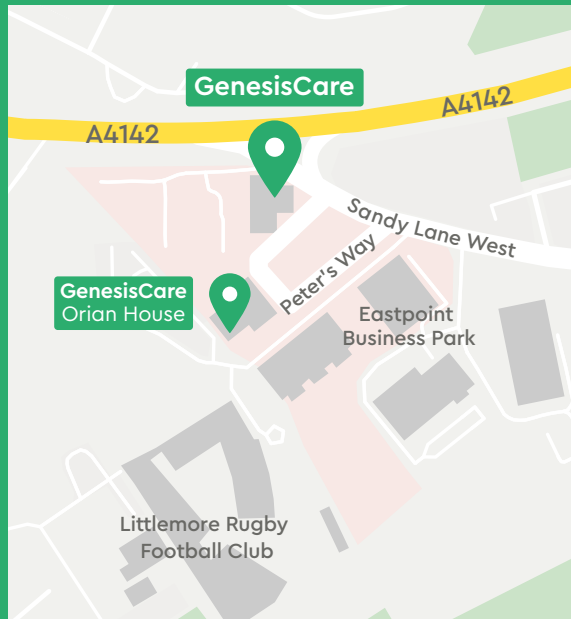

Leave the A34 at Hinksey Hill Interchange and continue over three roundabouts, following signs for Cowley. At the 4th roundabout (by Tesco Superstore), take the 5th exit and go back on yourself for approximately half a mile. Exit at Sandy Lane West – you'll see GenesisCare directly opposite on Peter's Way.

Opening hours

Mon to Fri,
appointments available
from 8.30am with
flexible closing
